

Western Kentucky Youth Camp Receives \$5,000 in Funding from The Lubrizol Foundation

(October 5, 2020) MARION, Ky. – The Lubrizol Foundation’s grant supports WKYC’s Participant Access Program for underserved campers.

Western Kentucky Youth Camp received a generous \$5,000 award from The Lubrizol Foundation to support its Participant Access Program for underserved campers. The goal of this initiative is to remove barriers to access for students from low-income areas or disadvantaged backgrounds so that campers may participate in WKYC’s summer session programming.

Directors of summer sessions will identify prospective campers who may be eligible for support based on the criteria set forth by the Participant Access Program. Campers attending Wonderfully Made Weekend, a new session designed for individuals with special needs, will also be eligible for financial assistance made available by The Lubrizol Foundation’s grant.

“We are thrilled about our partnership with The Lubrizol Foundation to allow campers to attend WKYC who would otherwise be unable to attend,” remarked Board President Jamey Boone.

The Lubrizol Foundation supports educational institutions and charitable organizations in communities where the specialty chemical company’s employees live and work.
